PROFILE

Frontend developer and BSc. CSIT student (graduating 2026) with hands-on experience through a remote internship, client projects, and a strong personal project portfolio. Skilled in building responsive, performant web interfaces using React.js, TypeScript, JavaScript, Tailwind CSS, and Vite. Comfortable across the full MERN stack and actively growing backend skills.

EXPERIENCE

Collab Pvt. Ltd. — Frontend Development Intern (Remote)

May 2025 – Oct 2025

- Developed responsive UI components using HTML, Tailwind CSS, and JavaScript, reducing design-to-code handoff time by translating Figma mockups directly into production-ready frontend modules.
- Improved frontend application load performance by migrating the build pipeline to Vite, resulting in noticeably faster cold-start and hot-reload times during development.
- Collaborated with the design team to ensure cross-browser compatibility and consistent UI behaviour across screen sizes, contributing to a polished user experience on all deliverables.

PROJECTS

Spotify Clone — Music Player | React, TypeScript

- Built a fully typed music player using TypeScript and React, implementing play/pause, next/previous controls, and audio state management, applying TypeScript interfaces and type-safe component props throughout.
- Designed a Spotify-inspired UI with playlist and liked songs features, practising component architecture and typed state management with React hooks.

GitHub: <https://github.com/shi26tal/spotify-clone>

E-Commerce UI | React, JavaScript

- Developed a responsive eCommerce interface with product listings, category filtering, add-to-cart functionality, and dynamic UI updates using React hooks and clean component structure.
- Deployed on Render with a fully functional demo, structured components for scalability and clean state management using React hooks.

Live Demo: <https://ecommerce-site-frontend-kiaw.onrender.com/>

WePlumbNHeat — Client Website | HTML, Tailwind CSS, JavaScript, SEO

- Deployed a production-grade business website for a UK plumbing and heating service, implementing semantic HTML and on-page SEO best practices that make the site indexable and accessible.
- Added interactive UI elements and ensured mobile-first responsiveness across major browsers.

Live: <https://weplumbnheat.co.uk>

Weather App | HTML, CSS, JavaScript, REST API

- Integrated a third-party weather REST API to fetch and display real-time city data including temperature, humidity, wind speed, and conditions, demonstrating async JavaScript and API consumption skills.

Live Demo: <https://shi26tal.github.io/Weather-app/>

E-Health — Hospital Appointment System | React, Node.js, Express.js, MongoDB

- Built login and signup pages with JWT-based authentication and implemented protected routes to restrict access to authenticated users only.
- Developed backend API routes using Node.js and Express.js, and modelled MongoDB schemas to support user accounts, hospital data, and appointment records.

EDUCATION

BSc. CSIT — Computer Science 2022 – 2026

Trinity International College, Dillibazar, Kathmandu | Result: Awaiting

High School — Science 2019 – 2022

Trinity International College, Dillibazar, Kathmandu

SKILLS

Frontend: HTML, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Vite

Backend & Database: Node.js, Express.js, MongoDB, REST API integration

Version Control: Git, GitHub (branching, pull requests, code review workflow)

Design & Tools: Figma, Canva, AWS Basic

Soft Skills: Client communication, remote collaboration, attention to detail, time management

CERTIFICATIONS

- **AWS Cloud Quest: Cloud Practitioner** — Amazon Web Services, 2026
- **MERN Stack Web Development Course** — N9 Solution, Dec 2024 – Mar 2025
